

Eagle Bank will host screening to detect stroke risk

"I am so thankful my doctor suggested your tests. I have had surgery on my right Carotid Artery and got along fine. I was 90% blocked. I had no symptom and was told the next thing would have been a stroke. I have already been recommending your service." **Jaye Miller - Kirksville, MO**

Two or more of these conditions and you are at risk:

Over 40 yrs. old	More than 20lbs. overweight	Family history of strokes
High cholesterol	Cigarette smoking	Diabetes
High blood pressure	Inactive lifestyle	Heart disease
TIA's - minor strokes		

The screening process offers four different tests:

Stroke Screening: This screening visualizes the buildup of fatty blockage in the carotid arteries. This condition causes the majority of strokes. **\$40**

Abdominal Aortic Aneurysm: This screening visualizes the existence of an aneurysm in the abdominal aorta that can rupture and be fatal. **\$40**

Peripheral Arterial Disease: This screening checks for blockage in the legs. Abnormal results indicate high risk of coronary artery disease and peripheral arterial disease. **\$40**

Osteoporosis: This test screens for abnormal bone density. Both men and women can prevent osteoporosis with early detection and treatment. **\$40**

"You found I have a small Aortic Aneurysm. I am so thankful to know it is there so my doctor can watch it. Your screenings are tremendous. It is so inexpensive for what you get out of it. I have mentioned it to everyone." **Don Lindsey - Bethel, MO**

Screening dates and locations:

Tuesday March 16th
Eagle Bank - Festus
680 S. Mill St.
9:00 - 4:30

Wednesday March 17th
Eagle Bank - Arnold
3944 Vogel Rd
9:00 - 4:30

Thursday March 18
Eagle Bank - Kirkwood
1052 S. Kirkwood Rd
9:00 - 4:30

Going to Stroke Detection Plus is probably the most important thing I have ever done. You found an Aortic Aneurysm. Two days later I had surgery and I am doing fine. It was 7.8cm and my doctor said in three days I could have been gone. My wife and I are so grateful. Some of my friends have already come in to your screening." **Larry Morley - Trenton, MO**

A doctor cannot order these tests without the patient showing signs & symptoms. It is estimated that two thirds of stroke victims did not have any warning. Board licensed radiologists provide screenings that would cost \$300-\$700 per test in the hospital setting. We estimate the percentage of blockage based on new research from the University of Washington. A board certified, licensed physician reviews all screening results, which are mailed to participants within 14 business days. The goal of this screening is to alert people of a health risk that might otherwise go undetected, and to inform them of the need for follow-up with their physician.
